Monster X

MOBILITY SCOOTER

The highly anticipated Monster X (vita S12X) is issued from years of technical development, as it utilises the best innovations in the industry! Some of this vehicle's stand-out-features are its top speed of 18km/h and its battery range up to 40km. Another advantage is its robust design made of large wheels with pronounced features that provide ideal traction on rough terrain such as snow. Its independent and adjustable front and rear suspension provides a smooth ride on any surface.

ATV or mobility scooter?

Although it's not an ATV, and doesn't aspire to be one, you might hesitate upon seeing it... There's nothing else like it. This scooter is proof that needing a mobility scooter to travel doesn't mean limiting where you can travel.

Monster X

MOBILITY SCOOTER

Thought and fancy

This model might look tough and rough with its eye-catching metallic black finish, red suspensions and shock absorbers, but comfort was an intrinsic part of its design. The Monster X has a fully adjustable rotating seat, with additional lumbar support and a striking red stitching finish.

Technical Specifications

CAPACITY

350 lb
160 kg

SIZE

62" x 30"

WEIGHT WITH BATTERY

330 lbs
150 kg

MOTOR TYPE

4-Pole 900W
